

PLANTATION HARVEST

Bribie Island, 2025

June 2025

Informing the community

July 2025

Start harvest and haul

2025 and ongoing

Site preparation and planting

We are harvesting an area of Southern Pine from our Bribie Island Plantation.

This is a planned and sustainable harvest involving only plantation-grown timber.

No native forests are being harvested.

Native forest buffers and waterways throughout the plantation are protected and maintained.

The harvested timber will be processed at local sawmills and used in various industries, including house construction, plywood production, furniture and joinery and landscaping materials.

Did you know, sustainable timber from our plantations builds 25,000 homes a year?

- We are holding a community drop in session if you would like more information on the upcoming harvest.
- When: Tuesday 24 June, 2025
- Where: Bribie Island RSL - Garden Room
- Time: drop in any time between 4:30pm - 7:30pm

Access to the harvest site will be via Hornsby Road, Benabrow Avenue and Bribie Island Road.

Our haulage trucks are similar in size with a configuration like other commercial trucks used on the Island.

For safety reasons, public access will be restricted in certain areas during the harvesting and re-establishment process.

Signage will be in place to advise of access restrictions.

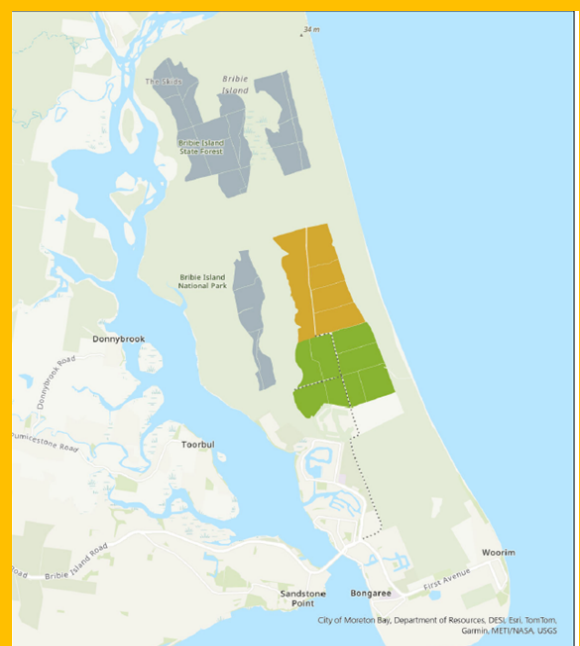

Following the harvest and site preparation, southern pine seedlings will be re-planted to ensure the ongoing sustainability of the plantation.

HQPlantations is committed to sustainability. We apply best-practice forest management techniques to ensure the long-term health of:

- Plantation ecosystems
- Neighbouring ecosystems
- Waterways
- Soil quality
